E05   As indicated, install 20A GFCI quad receptacle on emergency power   Electrical

M01   Locate supply grill 68" AFF   Mechanical
M02   Locate return grill 72" AFF   Mechanical
M03   Refer to spec section 111111 prior to installation of VAV control box   Mechanical
M04   Where indicated, allow 18" access clearance around all sides of unit   Mechanical
M05   Where indicated, install controls interface conforming to ASHRAE standard XYZ-123456 and ASME standard 803.11-N using 401(k) protocols. Mount top of control panels smaller than 8" at 48" AFF, mount top of control panels larger than 8" at 38.5" AFF, using attachment systems shown on mechanical detail sheet(s). Mechanical

P01   Install ADA compliant wall-mounted water closet   Plumbing
P02   Install ADA compliant floor-mounted water closet   Plumbing
P03   Backflow preventer valve, see spec 222222   Plumbing
P04   Backflow preventer valve, see spec 333333   Plumbing
P05   Install ADA compliant angled configuration drinking fountain, model 5800P   Plumbing

F01   Install high-flow unidirectional sprinklers   Fire Protection
F02   Refer to specification section for installation, mounting   Fire Protection

Keynote Number

Keynote Text

Keynote Discipline

Do Not break note line with hard return/enter. Auto word-wrap is allowed.

The Discipline designation of each line of keynote text must match discipline declaration EXACTLY, including spelling, capitalization, spaces, etc., and must immediately follow [TAB] character.

MUST include tab character between fields. (Can use spaces etc. before tab character.)
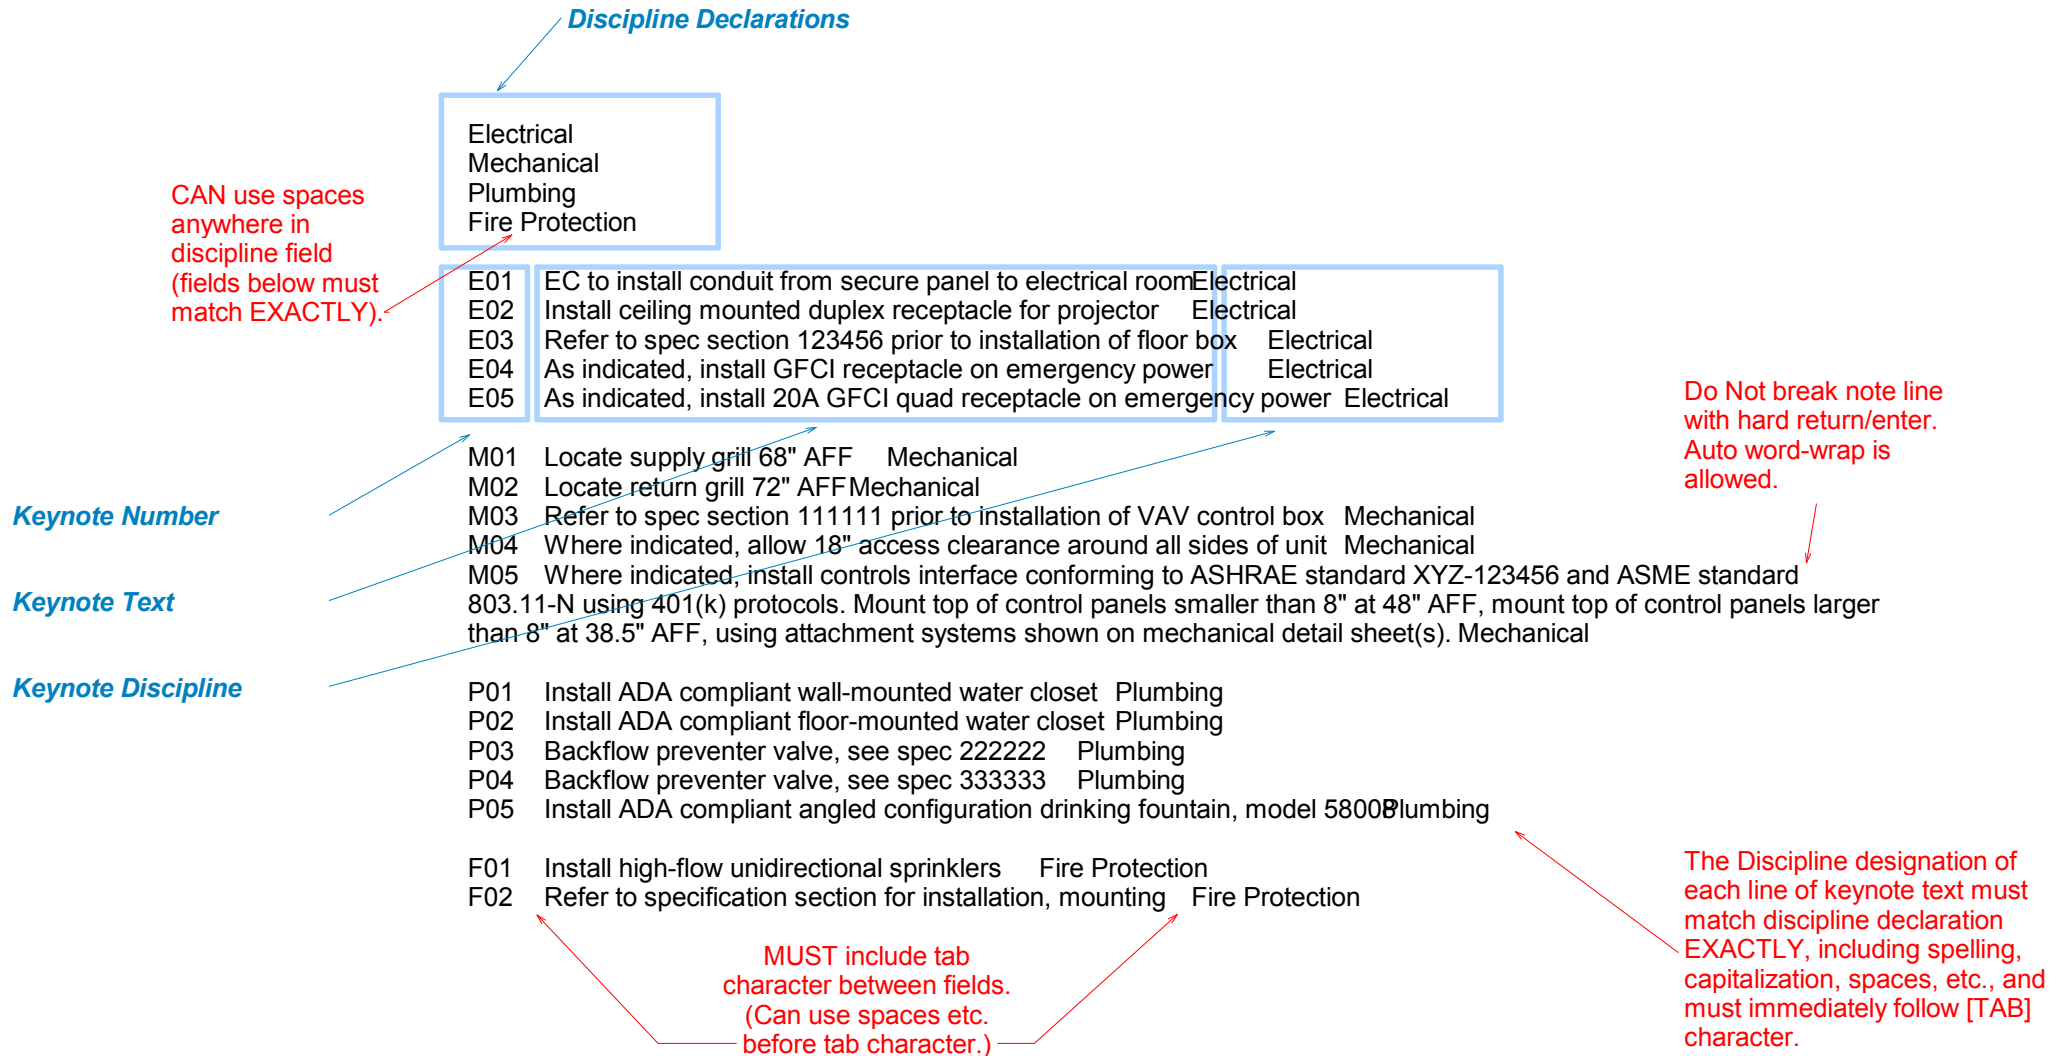

SYNTAX RULES:

- The top lines of the text file are discipline declarations. Only one discipline per line is allowed. An entire line will be used by Revit as a discipline designator, including any characters following on the same line such as a space.
- Additional blank lines (aka: hard returns) between separate lines of keynote text are allowed, but not required.
- Can use [TAB] or [SPACE] [TAB] characters between fields. [SPACE] is treated as any other alpha-numerical character.
- Cannot use multiple [TAB] characters between two fields.
- The # character denotes a line of remarks. Anything contained in the line that begins with a [HASH] character (#) will be ignored by Revit. Remark lines are allowed, but not required.
